Riverbend Church Auditorium Stage Construction – Gary Nelson

There was general discussion as to the location and size of steps, wood banister and gate in the banister in relation to the stage. The height or gate size in relation to the banister was not discussed. By consensus it was decided to wait until the pews are positioned before knowing where to locate the gate in the banister.

David Lindgren moved and Greg Soghoian seconded that:

- A step from the floor at the same height and width as the current step at the east wall; to proceed around the stage corner to the step at the north wall. AND....
- That a wood banister be secured to the stage floor extending from the step landing at the east wall; to proceed around the stage corner to the step landing at the north wall.

The motion passed with a unanimous voice vote.

At 5:16 p.m. President Nelson declared the meeting adjourned.

Respectfully Submitted,

Ronald D. Bergman

Secretary
